- 4 Offer

REFLECTION

- We learned that in order to expand our skills and knowledge we need to find someone that have some experienced in ICT industry and we can learn from them.
- We also learned how soft skills like communication, teamwork, and adaptability are just as important as technical skills
- And also that it is important for us to try developing software and keep or publish it into our Github account, it will be one of our resume when we want to apply for work afterwards.
- This talk also highlighted that job role in the industry in the field of information and communication technology (ICT) is a journey of constant innovation and learning, so we must always keep learning.
- The other speakers also suggest us to choose wisely who we are surrounded with because it will affecting the way we act and think
